Advertising Text

With the Eve Aqua smart water controller, activate your irrigation system via your iPhone, Siri, or the onboard button. You can also set up schedules quickly and easily, and let Eve Aqua take care of watering your garden and patio plants – completely automatically without requiring an internet connection, a bridge, or a gateway.

USPs: Autonomous schedules | 7 watering periods/day | No bridge | Compatible with all popular hose systems | Bluetooth & Thread

Recommendation for Placement

- Connected Home / Smart Home
- App-Enabled Technology
- Garden & Outdoor

Selling Points

Smart water controller with Apple HomeKit technology

- Control your sprinkler or irrigation system via the Eve app, Siri, or onboard button
- Effortlessly set up schedules that automatically water your garden independently of your iPhone and home network
- Compatible with all popular hose systems and multi-channel water distributors such as from Gardena or Kärcher; offers 7 watering periods
- Irrigate even when on the go – thanks to HomePod, HomePod mini, or Apple TV as your home hub
- Say goodbye to watching the water meter or flooding your garden thanks to the auto shut-off function, and keep track of how much water your garden is consuming
- Weatherproof & UV resistant, developed in Germany for maximum performance under all conditions
- Joins your Thread network automatically / supports Bluetooth and Thread
- Get up and running in a flash with quick & easy set up and no need for a bridge or gateway
- Apple HomeKit-enabled for outstanding ease of use and advanced security
- 100% Privacy: No Eve cloud, no registration, no tracking. Local intelligence and direct communication without bridge or cloud dependency.

Target Group

- Smart Home Buyers
- Technology Enthusiasts
- Gardeners
- Families, iOS Users
